Simple content module	Headline	Which gazebo for which weather?						
	Subline (right side)	For protection from the sun						
	Paragraph (right side)	All high quality gazebos at House of Tents have a high UV resistance - ideal for hot summer days. If UV protection 30+ is enough for you, then the Rendezvous and Sunset steel garden gazebos are just right. If you would like increased protection against UV radiation, then we recommend either our PE marquees, our garden gazebos in the Premium and Deluxe lines, or our Economy steel and Economy aluminium pop up gazebos. All these gazebo tents offer great UV protection of SPF 50+. For the ultimate in sun protection all of our high quality PVC (Profi-line) marquees, as well as the						

		Premium steel and Professional aluminium pop up gazebos offer UV protection of SPF 80+.

Filename	gazebo-sun-protection.jpg													
Alt attribute	Pop up gazebo with high UV protection													
Title attribute	Pop up gazebo with high UV protection													
	Subline (left side)	For protection from the rain and snow												
	Paragraph (left side)	<p>All gazebos at House of Tents are 100% waterproof. But especially in winter, a season with a lot of wind and heavy rain, the gazebo frame makes all the difference. For example, heavy duty gazebos are more weatherproof than wooden frames. Wooden gazebos are also waterproof, but over time, the wood can rot and splinter. Steel gazebos on the other hand, are very weather-resistant while aluminium gazebos provide the best protection from rust.</p> <p>For garden gazebos that will be standing in one place over winter, we advise choosing a model with a hardtop, as the heavy duty polycarbonate panels can stand up to the worst weather conditions. Depending on the model, they can even withstand snow loads of 50 to 80 kg/m².</p>

Accordion module (base with media)	Accordion item label	Waterproof marquees												
	Accordion item paragraph (Look for hyperlinks within content!)	<p>Celebrate great parties in the garden regardless of the weather - great quality outdoor canopies allow you to throw parties with less stress. Celebrate birthdays, weddings or host events in your garden. All marquees from House of Tents are 100% waterproof and if you choose a PVC garden tent, you will also be able to enjoy shelter deep into the autumn. To ensure that your product also stands up to strong winds, you will find accessories to increase its stability in our shop. Equip your marquee with a base frame, for example. Thanks to the groundbar frame, the legs of your marquee cannot slip in strong winds, giving it more support. Ground anchors for your patio or garden are also advisable.</p> <p>Tip: A storm has been announced or even snow? Read our magazine article on how to secure your garden tent against rain, snow and wind. This magazine article also presents and compares the various accessories - weights or anchors for soft and hard grounds including concrete, as well as tie down kits.</p>

Accordion item label	Waterproof pop up gazebos																		
Accordion item paragraph (Look for hyperlinks within content!)	<p>All pop up gazebos from House of Tents have a robust frame - made of either steel or aluminium. These are available with a square or hexagonal profile. If a gazebo is to be weatherproof, the tarpaulin must also be 100% waterproof. The tarpaulins of our pop up gazebos are available in PVC as well as in PVC-coated high-performance polyester. The special feature that ensures that these tarpaulins are waterproof? All seams are thermo-sealed. The quality of the seams is therefore very high and prevents water from penetrating the pop up gazebo. You will also find a large range of accessories for foldable tents on our site.</p> <p>For an impressive appearance, an awning is particularly recommended. This not only looks very professional, but also protects against rain from the side and low sun. The tarpaulin material of the awning also has a UV protection rating of SPF 80.</p> <p>Tip: Pop up gazebos are an excellent solution for giving shelter and shade wherever you need it. They are easy to erect, which make them the go-to choice as an event shelter at outdoor events. While they can't match the heavy duty weather resistance of other gazebo products, it's easy to fold the structure up and pop a gazebo cover over the top. The cover will protect the frame and canopy from the worst weather conditions.</p>

Accordion item label	Waterproof garden gazebos																		

	<p>Accordion item paragraph</p> <p>(Look for hyperlinks within content!)</p>	<p>Garden gazebos are available at House of Tents with a tarpaulin canopy as well as with a fixed roof made of polycarbonate panels. Both shelters are 100% waterproof, stable and UV-resistant. However, when the cold season arrives, we recommend that you remove the tarpaulin canopy and put it into storage. This is because strong temperature fluctuations can damage the polyester and, in the worst case, lead to breaks in the tarpaulin material. The hardtop fixed roof, can remain outside in the garden throughout the winter. All garden gazebos are delivered including sidewalls. With the sides, you can close the waterproof gazebo completely or leave it open. The side wall panels can be hung loosely at the leg poles, with sides connecting to each other with water-resistant zips. We recommend that you close the sides overnight to ensure wind can't collect underneath the gazebo canopy.</p> <p>Tip: There's nothing better than enjoying a small get-together with friends on a warm summer evening on the patio. Even better if you have a canopy over your hot tub. It can all be ruined by mosquitos and midges though. Side walls can be replaced with great quality mosquito nets with a fine mesh fabric from our shops to keep bugs at bay. The Sunset Premium and Deluxe models have a double rail system so the mosquito nets can be attached alongside the side walls.</p>

<p>Accordion module (base)</p> <p>FAQ</p>	<p>Headline</p> <p>Accordion item label</p> <p>Accordion item paragraph</p> <p>(Look for hyperlinks within content!)</p> <p>Accordion item label</p> <p>Accordion item paragraph</p> <p>(Look for</p>	<p>FAQ: Frequently asked questions</p> <p>In which sizes are gazebos available at House of Tents?</p> <p>You'll be hard pressed to find a large variety of sizes of gazebo, starting from 2x3 metre models, with 3x3m gazebos being our biggest sellers. Marquees extend to a maximum size of 8x36m. For pop up gazebos our product range extends to 5x5m large gazebos. Garden gazebos are available as either 3x3m or 3x4m structures.</p> <p>What different colour gazebos are available?</p> <p>The 3x3 m gazebo for example, is available at House of Tents in fifteen different colours. Pop up gazebos come in the widest variety of colours ranging from white to grey to intense colours such as petrol, orange or purple. For trade fairs or market stalls, plain colours such as white and grey</p>																		

	hyperlinks within content!)	are particularly popular. Garden gazebos feature classic tones that complement the outdoor environment such as stone and loft grey. Marquees meanwhile come in white or dark green. A decorative striped pattern is also possible with blue, grey, green or red stripes combining with white.							
	Accordion item label	Are the side walls waterproof?							
	Accordion item paragraph (Look for hyperlinks within content!)	Yes! The sides of all of our gazebos and marquees, just like the canopies themselves, are completely waterproof. Seams are welded with a waterproofing plastic sheet that ensures that no water will enter the shelter from the sides. The side panels of the marquee gazebos, for example, are made of high quality PVC and are 100% waterproof. You will also find gable sides and side panels with built-in zip doors in our range of accessories.
